GB The history of our company dates back to 2014. Born from a passion and a deep understanding of the printing market, we established a brand that today serves as a vital support for printing houses, publishers, and independent bookbinders. Over a decade of uninterrupted activity, we have earned the trust of a broad client base. This success is not a matter of chance, it is a result of a professional combination of knowledge and experience. The foundation of our company is a team of qualified professionals with years of experience in two key sectors: bookbinding and textiles. This unique blend of skills allows us to create materials that are not only aesthetically pleasing, but also highly durable and functional. JDR Technik specialises in comprehensive solutions for hardcover production. We started by manufacturing essential book components, such as bookmarks, headbands, and crepe paper. Due to the quality we offer and our attention to detail, these products have become our trademark. Recognizing the well-known saying that “a book is judged by its cover”, we expanded our product selection to include a wide range of cover materials, bookbinding cloths, and papers. This enabled us to build a recognizable brand. Our products are specifically designed to meet the needs of modern industrial bookbinding, ensuring precision in machine processing. At the same time, we have not forgotten about the roots of our craft. Presented materials are also the top choice for classic bookbinders, producers of exclusive photo albums, and creators of fine stationery who value unique textures and aesthetics. Many years of experience and client feedback have shaped our current offer, which is based on proven, high quality products at competitive prices. We distribute our materials throughout Poland and across Europe, guaranteeing fast delivery and professional technical advice.
