

GB The history of our company dates back to 2014. Born from a passion and a deep understanding of the printing market, we established a brand that today serves as a vital support for printing houses, publishers, and independent bookbinders. Over a decade of uninterrupted activity, we have earned the trust of a broad client base. This success is not a matter of chance, it is a result of a professional combination of knowledge and experience. The foundation of our company is a team of qualified professionals with years of experience in two key sectors: bookbinding and textiles. This unique blend of skills allows us to create materials that are not only aesthetically pleasing, but also highly durable and functional. JDR Technik specialises in comprehensive solutions for hardcover production. We started by manufacturing essential book components, such as bookmarks, headbands, and crepe paper. Due to the quality we offer and our attention to detail, these products have become our trademark. Recognizing the well-known saying that “a book is judged by its cover”, we expanded our product selection to include a wide range of cover materials, bookbinding cloths, and papers. This enabled us to build a recognizable brand. Our products are specifically designed to meet the needs of modern industrial bookbinding, ensuring precision in machine processing. At the same time, we have not forgotten about the roots of our craft. Presented materials are also the top choice for classic bookbinders, producers of exclusive photo albums, and creators of fine stationery who value unique textures and aesthetics. Many years of experience and client feedback have shaped our current offer, which is based on proven, high quality products at competitive prices. We distribute our materials throughout Poland and across Europe, guaranteeing fast delivery and professional technical advice.

GB **WIKITEX Kanafix** is an improved version of the well-known cotton bookbinding cloths.

Made from 100% premium quality cotton, WIKITEX Kanafix bookbinding cloth guarantees unparalleled durability and aesthetics. What sets it apart is a specially developed starch finish applied to the underside of the material. This gives the cloth exceptional dimensional stability, eliminating the risk of deformation and creating an impermeable barrier to glues. Moreover, the absence of a paper backing ensures extraordinary flexibility, which is crucial during advanced bookbinding work such as creating rounded corners, making boxes, or other projects requiring mechanical tensioning of the cloth.

WIKITEX Kanafix cloth is also synonymous with strength. Its dense, uniform fibers guarantee excellent mechanical resistance, ensuring that books, albums, or other bookbinding products bound with it will last for many years. In an era of growing ecological awareness, WIKITEX Kanafix aligns with the latest trends, offering an environmentally friendly product without compromising on quality and performance. By choosing WIKITEX Kanafix, you opt for professionalism, durability, and ecological responsibility.

Discover new quality in bookbinding with WIKITEX Kanafix.

Technical specification:

- roll width: 106.7 cm
- roll length: 50 m
- basis weight: 210 g/m²
- thickness: 0.34 mm

PL **WIKITEX Kanafix**, to ulepszona wersja znanych bawełnianych płócien introligatorskich.

Płótno introligatorskie wykonane w 100% z najwyższej jakości bawełny, WIKITEX Kanafix to gwarancja niezrównanej trwałości i estetyki. To, co wyróżnia je na tle innych, to specjalnie opracowana apretura skrobiowa naniesiona na spodnią warstwę materiału. Dzięki niej płótno charakteryzuje się wyjątkową stabilnością wymiarową, co eliminuje ryzyko odkształceń oraz stwarza barierę nieprzepuszczalności dla klejów. Co więcej, brak nośnika papierowego zapewnia wyjątkową elastyczność, co jest kluczowe podczas zaawansowanych prac introligatorskich, takich jak wykonywanie zaokrąglonych rogów, tworzenie pudełek czy innych projektów wymagających mechanicznego naciągnięcia płótna.

Płótno WIKITEX Kanafix to także synonim wytrzymałości. Jego zwarte, jednorodne włókna gwarantują doskonałą odporność mechaniczną, sprawiając, że oprawione nim książki, albumy czy inne wyroby introligatorskie będą służyć przez długie lata. W dobie rosnącej świadomości ekologicznej, WIKITEX Kanafix wpisuje się w najnowsze trendy, oferując produkt przyjazny dla środowiska, bez kompromisów w kwestii jakości i wydajności. Wybierając WIKITEX Kanafix, stawiasz na profesjonalizm, trwałość i ekologiczną odpowiedzialność.

Odkryj nową jakość w introligatorstwie z WIKITEX Kanafix.
